I support Alternative D of the Revised Draft Forest Plan but the entire 230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness must be included in the final forest plan. The plan should prohibit all motorized and mechanized uses, and any other activities not consistent with wilderness protection, in the Recommended Wilderness areas so as to preserve their wilderness qualities until Congress acts on the wilderness recommendations.

In the Absaroka-Beartooth and Lee Metcalf Wildernesses, the wilderness management plan should reduce group size limits to protect all Wildernesses on the forest from the destructive effect of larger groups. Further, the forest plan should put an end to ecologically destructive fish stocking in naturally fishless wilderness lakes, which significantly alters the areas' natural conditions.

The plan must address the issue of human and pack animal feces contamination of lakes and streams on the Beartooth Plateau in the Absaroka-Beartooth Wilderness. Eliminating fish stocking would likely go a long way toward solving this problem, but additional measures must be included if needed.
