Comments:

I believe in strengthening and supporting Alternative D. We need viable sustaining populations of American Bison on/in the Custer-Gallatin National Forest.

American Bison are to be considered as a species of conservation concern.

We need to use controlled fire as a natural way to expand habitat.

We need to remove barriers to migration.

And lastly we need to enhance existing, and establish new habitat connections, to support and guarantee American Bison's unhindered freedom to roam all National Forest habitat.
