Comments:

I do not have time to read hundreds of pages and many alternatives that this plan includes. I would suggest a quick fact sheet for the general public to understand how they would be impacted in order to gain more understanding of what our public servants are proposing. I actively use these lands for hunting, fishing, hiking, horseback travel, backpacking, snowmobiling, and what little ohv riding is allowed.

As a multiple use person, I can say that these lands are severely skewed towards non-motorized use. It is ridiculous how many acres are dedicated to wilderness or no-road or motorized trail areas. You could consider that I am on both sides of this argument, and I can easily see that while motorized recreation is a huge draw in Montana, the federal lands in this national forest are heavily biased towards non motorized travel.

Please give us back more riding areas. For goodness sake don't take any more away. That is all I am concerned about with a new plan. Thanks.
