Subject: [Website feedback] Custer Gallatin Forest Plan Revision!

Janet Cavallo (not verified) (squirrelbuddy@aol.com) sent a message using the contact form at <http://www.fs.fed.us/about-agency/contact-us>.

Message

I support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan; however, they must be improved by adding the entire

230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness in the final forest plan.

The plan should prohibit all motorized and mechanized uses, and any activities not consistent with wilderness protection, in the Recommended Wilderness areas so as to preserve their wilderness qualities until Congress acts on the wilderness recommendations.

The draft plan has little direction for administering the Absaroka-Beartooth and Lee Metcalf Wildernesses. The current wilderness management plans allows destructively large groups of 25 head of stock (horses/mules) and 15 people in most areas. The Forest Service should reduce group size limits so as to protect all Wildernesses on the forest from harm. The forest plan should put an end to ecologically destructive fish stocking in naturally fish-less wilderness lakes, which significantly alters the areas' natural conditions. The plan must address the issue of human and pack animal feces contamination of lakes and streams on the Beartooth Plateau in the Absaroka-Beartooth Wilderness.
