Comments:

The Custer Gallatin National Forest in Montana is a stronghold for iconic wildlife species like grizzly bears, gray wolves, bighorn sheep, mountain goats, and moose, which are very sensitive to human disturbance and development, and are teetering on the brink. The Gallatin Range is particularly at risk of being sacrificed as a motorized and mechanized recreational playground for the exploding populations of Big Sky and Bozeman. I think Alternative D of the draft forest plan would offer the best protection for the Gallatin Range and other critical wildlife habitat across the Custer Gallatin National Forest.
