Comments:

I am writing as a mountain biker, backpacker, and overall outdoorsman in support of maintaining access for mountain bikers in the lion head area. Mountain bikers have spent thousands of combined hours on trail maintenance in this area, with annual trail clearing events tackling hundreds of downed trees and washed out trail each year.

The impact that mountain bikes have on this wild, beautiful backcountry area is in many cases much less than that of other recreationalists such as hikers building fire rings, walking two people wide on single track, horses ruining trail by riding in mud, etc.

Please allow bikers to continue responsible maintenance and use of this prized area.
