I support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan. Also add the entire 230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness in the final forest plan. No motorized and mechanized uses. only activities that are consistent with wilderness protection should be allowed. Improve the content on administering the Absaroka-Beartooth and Lee Metcalf Wildernesses. No large groups of stock (horses and mules) and people in most areas. limits need to be made to protect all Wildernesses from harm.

Stop fish stocking in naturally fishless wilderness lakes, which significantly alters the areas' natural conditions.

Last but not least, if you have people and animals, you have poo. sewage issues need to be addressed. the best solution: stop adding unnatural fish and you cut down on animals, people and poo.
