Comments:

Just wanted to voice my OPPOSITION to the proposed closures. The Custer/Gallatin National Forest doesn't need any more closures or restrictions. This would force certain user groups into more confined areas creating overcrowding and increased user conflicts.

The Custer/Gallatin National Forest is a vast area that can easily accommodate various user groups with limited impact and conflict. Why would anyone want to limit the user area creating more stress and strain to limited areas.

Please consider a revised forest management over closed areas. No one wins when public lands are taken away from the people.

I moved away from the area when I divorced and recently purchased land to move back to the area this summer and would be heartbroken knowing my access to public lands were being taken away.

Thank you for your time.  
Gaylan Hellyer
