Custer Gallatin National Forest  
Attn: Forest Plan Revision  
10 E Babcock  
Bozeman, MT 59771

Dear Mary Erickson,

I am commenting on the proposed forest plan for the Custer Gallatin National Forest. I support alternative D. Knowing that there has been a lot of research and thought put into this processes, sometimes just looking and watching over time will expose the practical solution.

My desire is to see free-ranging herds of American Bison restored to national forests across the western states. Having seen bison in the Custer Gallatin National Forest two weeks ago was a memorable experience.

Propagation of all wildlife should be the primary goal of the forest plan. Transferring animals to other forests would be the ultimate reward of everyones efforts.

Please keep these general comments in mind while making the final determination.

Sincerely,

Sam Henzel
