

Dear Custer-Gallatin National Forest:

I am a former fires crew member from 1990-94 I was able to get to know the Custer guide well. OF the various addresses in your summary these names that I know are close to heart. As for the it goes, I believe there needs to be more LEO patrol for ATV use. Too many "new" roads/trails are being used. I agree that the high dump/photow in the bygs should be designated area with a mess. Motor vehicles do more damage up there than good. The Crows culture considers it sacred and I believe if you would like to visit/experience the area it should be as best.
