Comments:

I support alternative D of the draft forest plan with the suggested improvements to include the entire acreage of the Gallatin Range in the final plan. Our wild lands must be protected to guard against a number of negative effects such as motorized and mechanized uses which disturb wildlife. Further, these fragile ecosystems are all important as they provide critical and species appropriate habitat without the human intrusion which can only bring harm to its wild denizens. The integrity, stability and beauty of our wild places must be preserved.
