Comments:

Wilderness advocates do forest protection a great disservice by banning bicycling from areas they would protect. Why allow a graying and shrinking group of Wilderness purists to alienate the fastest growing group of forest protection advocates, bicyclists? We need more trails to explore and support by bicycle, not less.

Please manage Recommended Wilderness Areas to allow continued bicycling. Please allow continued access to the Lionhead for bicycling as allowed in Alternative E. The GFBC supports the Gallatin Forest Partnership Agreement. Please implement the recommendation in the Agreement.
