Comments:

Hello,

I am in favor of Alternative D for the Custer Gallatin National Forest Plan. We need to protect American Bison, Big Horn Sheep and threatened grizzly bears from the further encroachment of motorized vehicles. We need to leave wilderness areas as wilderness. There are enough places for motorized vehicles in the rest of the world. Let's keep these places noise and motor free, which is what wildlife, and those of us who find peace in the tranquility of wilderness need.

We need habitat corridors for connectivity to allow for seasonal migration, genetic diversity and food sources for all wildlife. These need to be adopted as standards, in the GYA/NCDE, not just guidelines. Standards would establish objectives, to measure progress. Guidelines do not.

Thank you

W. K.
