Comments:

I support the wilderness recommendations in Alternative D of the Revise Draft. However there is improvement needed by including the ENTIRE 230,000 wild, roadless acres of the Gallatin Range as Wilderness in the final forest plan.

The draft has little direction for administering the Absaroka-Beartooth and Lee Metcalf Wildernesses. The draft plan allows too large groups, both livestock and humans, that are destructive to the wilderness as been proven by research.

The Forest Service should abolish ecologically destructive fish stocking in wilderness lakes that are naturally fishless. This will seriously alter the areas' natural conditions.

We need these sacred places to be maintained as Wilderness where human contamination will destroy what is Omnipotently Nature.

Thank you.
