Comments:

The draft plan has little direction for administering the Absaroka-Beartooth and Lee Metcalf Wildernesses. The plan must address the issue of human and pack animal feces contamination of lakes and streams on the Beartooth Plateau in the Absaroka-Beartooth Wilderness. Eliminating fish stocking would potentially solve this problem, including no trail re/construction in no trail areas. I support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan if adding the entire 230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness in the final forest plan is included.
