Comments:

I strongly urge that group-sizes in wilderness not exceed eight head of stock and 12 people. This will help preserve this special place.

In addition I ask that vacant grazing allotments in the Wildernesses be closed so they can return to a wild condition. Please take action to mitigate human and pack animal waste in lakes and streams on the Beartooth Plateau in the Absaroka-Beartooth Wilderness. Eliminating fish stocking would likely go a long way toward solving this problem, but additional measures must be included if needed.

I support Alternative D wilderness recommendations in the Revised Draft Forest Plan, However, they must be improved by adding the entire 230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness.

The plan should prohibit all motorized and mechanized uses, and any other activities not consistent with wilderness protection, in the Recommended Wilderness areas so as to preserve their wilderness qualities until Congress acts on the wilderness recommendations.
