Comments:

Please go with the wilderness recommendations in Alternative D of the Revised Draft Forest Plan. But they don't go far enough; they must be improved by adding the entire 230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness in the final forest plan. The following point also expand on the importance for the wild Gallatin Range. The draft plan has little direction for administering the Absaroka-Beartooth and Lee Metcalf Wildernesses. The current wilderness management plans allows destructively large groups of stock and people in most areas. The Forest Service should reduce group size limits accordingly so as to protect all Wildernesses on the forest from harm. I also support ending destructive fish stocking in naturally fishless wilderness lakes, which significantly alters the areas' natural conditions.
