Comments:

As a resident and a user of these areas I vote to leave as is. The solution to an increase in population is not to close access. These trails and this land should be open to all uses. Many wild life depend on seasonal users for survival. Winter big game uses snowmobile trails and in the summer they use trails created by humans. It is known and it is seen people, hikers do not hike in wilderness areas because it is not maintained and accessible. wilderness renders an area unusable to all. This creates more conflict and stress on other trail systems in the local area.

Leave our land alone and do not allow outsiders to close it
