

Dear Custer Gallatin National Forest:

I am avid outdoors person, with a Master's degree in Ecosystem Based governance. These hills provide the solace that Boston, MA could never give. Living and working in these hills has been the best decision the beauty, ecosystem services they provide and serenity is why I moved to Red Lodge, MT and is the basis of the local economy. I recommend maintaining the existing 22,500 acres ~~as~~ the Crownland Wilderness (no action ALT A). The Gallatin Forest Partnership agreement would be a benefit to all (ALT C). The Crazy Mtns should remain wilderness w/ no mechanized trails, and should be managed in conjunction w/ the Crow Nation and the private landowners -- The Pinyons should be managed w/ care, Bear Canyon ~~GN~~ Plains, Big managed as ALT D B Area managed as reflected in ALT B. Ashland Ranger area managed for wilderness ^{name} _{phone/email} ^{phone/email} _{phone/email} Finally, Management of recovered wilderness areas should prohibit non conforming uses in RWAs w/ clear standards.

I (my family) enjoy the following in the Custer Gallatin National Forest (circle all that apply)
