Comments:

G'day,

I formally request that we have no further land closures at this time. I feel that there are plenty of wilderness study areas around Montana. We, as motorized access users , have as much right to use these lands as do any other US citizen. I do not feel there is contributing scientific facts that say that motorized use has any more impact than any other form of usage. Therefore, there needs to be more data collected and presented before any more closures are enacted.

Thank you for listening to the public.
