Comments:

I support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan; however, they must be improved by adding the entire 230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness in the final forest plan.

The plan should prohibit all motorized and mechanized uses, and any other activities not consistent with wilderness protection, in the Recommended Wilderness areas so as to preserve their wilderness qualities until Congress acts on the wilderness recommendations.

We have so few areas in this country where we can enjoy the peace and quiet away from loud and annoying motor vehicles.

I live in an area with a lot of ATV traffic in the forest and I can definitely say that the loud ATVs with accompanying generators running all night is not conducive to the wilderness experience and also harms the wildlife
