Comments:

I support Alternative D of the Revised Draft Forest Plan as a starting point, but urge you to make several changes..

First the entire 230,000 wild, roadless acres of the Gallatin Range should be included in the in the recommended wilderness.

Secondr prohibit all motorized and mechanized uses, and any other activities not consistent with wilderness protection, in the Recommended Wilderness areas until Congress acts on the wilderness recommendations.

Third, protect lades and streams on the Beartooth Plateau from human and pack animal feces contamination by prohibiting grazing and stocking stream with fish.

In short strength option D to preserve this area as a wilderness.
